A7 - From 29 December 1995 to 14 January 1996, DL9FCQ will be QRV again as A71AN/DL9FCQ working mainly in CW on all bands from 80 to 10 meters (WARC included). QSL to DL9FCQ, via bureau or his address: Thomas Backert, Freigerichterstrasse 26, 63579 Freigericht 1, Germany or P.O. BOX 1139, 63590 Hasselroth, Germany.

CE0 - Following what published in previous numbers, these are last information about XR0Y (Easter Island 5-20 September) and XR0Z (Salas y Gomez 7-11 September) operations: the DXpeditions will transmit on or near the following frequencies. The listening frequencies will be announced on the air.

24.930	then moves to next higher frequency.				
28.200	The cycle repeats once per minute.				

The beacon XR0Y/B (Easter Isl.) will be QRV from 1 to 21 September. They request exchange of real signal reports rather than the normal "59" or "599" DXpedition report. This will slow the rates some, but we need the information to study propagation. You are invited to dupe the expeditions in order to help us study propagation, but please do it only on different band-days. If there is a big pile-up please be considerate of others who have not yet worked the DXpedition. They will be logging with a CT network, so they will know if you are a dupe. For a station's first QSO with the expedition, a printed QSL card will be put in the U.S. mail to you within 24 hours after the QSO if they can find a valid mailing address in the available callbook. For all logged QSOs, a "Congratulations" e-mail message will be sent to you automatically, if you are in the QRZ database maintained by Fred Lloyd AA7BQ. To add yourself to the database, either send an e-mail message

To: update@qrz.com

Message: comqrz_update your_callsign your_email_address
or log into the WWW site with the URL <http://www.qrz.com>

The expedition is presented in a series of pages on the World Wide Web. These show maps, lists of people, latest information about the expedition, etc. During the expedition the pages will be updated daily. The URL for the site is <http://ve7tcp.ampr.org/DX/easter>. QSL manager will be Mary Ann Crider WA3HUP, 2485 Lewisberry RD., York Haven, PA 17370. Your QSL card will contain a printed barcode which contains all the information about the QSO. It can be read by standard readers capable of handling Code-39 barcodes. The purpose of the barcode is to facilitate future processing by validating agencies such as the ARRL/DXCC. More in the next number.

From 1 August Dieter has collected all the requests (he is not the QSL manager for this operation then he has not the logs) and he don't want to repeat the job. Then, the only valid QSL route now is: Mr Joao Batista G. Mendonca, P.O. Box 3100, Rio de Janeiro, RJ 20001-970, Brasil, South America. Enclose 2 IRCs (don't use green stamps) and a SAE.

QSLs for DP0MIR should be sent to DARC QSL bureau.

PIRATES -> I4LCK reports that he received from JE1DXC, to which he asked the T20XC QSL (worked on 10 MHz last 16 June at 1723Z), the information about his non-activity in that data/hour. Masa informs also that he worked very few european stations during the last pacific trip, but he's receiving many requests from Europe for QSO during hours when he was not QRV.
